

## ABOUT US

Amiri – aSolu develops software for quality management systems. *MDPM* is our product which is a document management system and supports users for managing of documents and records.

MDPM has two options:

- QM-Task
- MDPM

Customers can order one of them or both together.

Our focus is to support manufacturers with these products to avoid the efforts of managing the documentation, required from regulations and standards (e.g. GDP, EN ISO 9001, EN ISO 13485).

### Why you should choose our products:

- Our products are developed to fulfill the requirements from regulations and standards.
- Our products are inexpensive and therefore, there are also affordable for smaller companies.
- Our products have a high level of quality. We develop our software based on the V-Model and perform verification and validation tests.
- We are a small company and that is our strength - this make it easier for us to be accurate and fast!
- We are working customer-oriented.
- Our software solution is based on hands-on experience. Therefor, our mission is to fulfill real-life needs of customers.

## Features comparison between MDPM and QM-Task

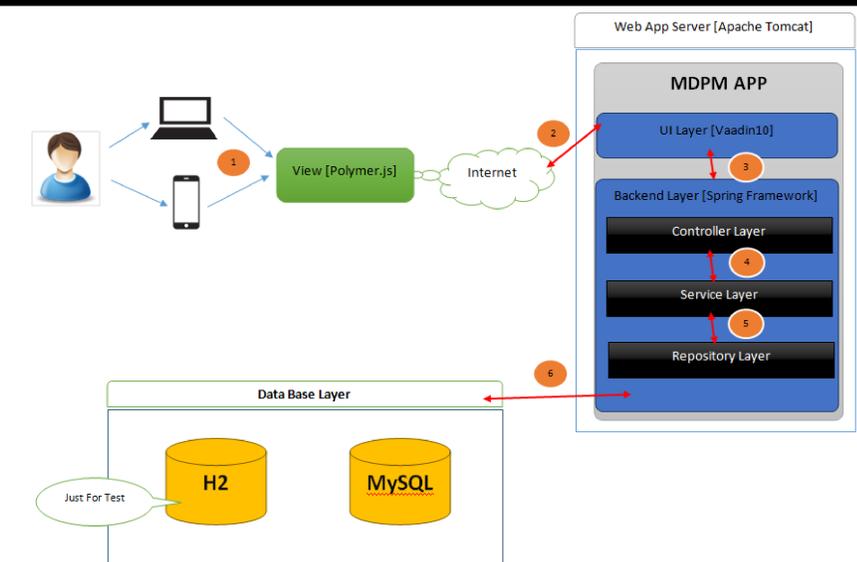

CRITERIA	MDPM	QM-Task
Login with password Passwords are encrypted. One-fits-all login	X	X
Build of development and life cycle engineering procedure with workflows	X	
Version history	X	X
User roles	X	X
Product related change management	X	
Flexibility in build of quality management system structure		X
File name searching	X	X
Automatic archiving of DHF and DMR	X	
Project management	X	
Audit trail	X	X
Automatic updating of version information in word files	X	X
Control of documents and records	X	X
Compatible on PC, Laptop and all mobile devices Independent of operating system	X	X
Monitoring system	X	X
Content management	X	X

## TECHNICAL DATA

Spring boot 2.0.3  
Spring 5.0.7  
Spring Data JPA 2.0.8  
Hibernate 5.2.17  
Vaadin 10 & Polymer 2.6  
MySQL Database 5.7+  
H2 Database 1.4+

## PREREQUISITE

**Software**  
Java 8  
MySQL Database 5.7+  
MySQL Workbench 8.0  
**Hardware**  
4 Processor 1.80 GHz  
At least 4GB RAM

A combination of both options makes it possible to fulfill product related change requirements, control of documents and records and to have a stable development and life cycle structure for your devices. **MDPM with all of mentioned features is more than a normal document management system.**
